

PAINS BAY FIRE

NC-ALR-111006
PRF3FT (1502)

Incident Action Plan

Saturday

June 4, 2011

0700-1900 hrs

INCIDENT OBJECTIVES	1. INCIDENT NAME PAINS BAY FIRE	2. DATE PREPARED 6/3/2011	3. TIME PREPARED 2130
4. OPERATIONAL PERIOD (DATE/TIME) Friday, June 4, 2011 0700 to 1900 hrs			
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)			
<p><u>Control Objectives</u></p> <ol style="list-style-type: none"> 1. Provide for the safety of firefighters and general public by adherence to the 10 standard fire orders, 18 watch-out situations, in addition to maintaining direct and clear communications with all incident personnel and the general public. 2. Keep fire contained west of US Highway 264, south of US Highway 64 and east of Milltail Creek. 3. Coordinate with Dare Emergency Mangement Coordinator to initiate evacuation if fire threatens the village of Stumpy Point. 4. Continue to monitor traffic conditions on US Hwy 264. Maintain 24 hours LE presence at designated areas to provide for immediate closure, if needed, for escaped fire. 5. Make appropriate notifications to NCDOT, EM, NC State Highway Patrol, USFWS and D13 operations for predicted "superfog" or dense smoke events. 6. Continue to implement written Water Handling Plan. 7. Ensure that suppression & containment strategies on FWS property follow minimum impact suppression tactics. Escalation of tactics should consider amount of progress being made with current tactics, and the likelihood of those tactics being successful. <p><u>Management Objectives</u></p> <ol style="list-style-type: none"> 1. Keep general public & local officials in affected counties, as well as incident stake holders informed of fire status through situation updates and personal contacts. 2. Provide for accurate cost tracking and documentation of incident in accordance with IBH (Incident Business Handbook) procedures. 3. Emphasize cost containment through continual assessment of personnel and resource needs to provide correct staffing of incident. 			
6. WEATHER FORECAST FOR OPERATIONAL PERIOD			
Mostly Clear, 0% rain, 83°, N5G13 to N7G13, RH 37%, LAL 1, ADI gen. good, LVORI 1, BC4			
7. GENERAL SAFETY MESSAGE			
<p>See Attached Tailgate Safety Briefing Sheet.</p> <p>Supervisors sign after completing & return to Documentation Unit.</p>

Tailgate Briefing

Fire Behavior Forecast
 Time and Date Forecast Issued: 1900 Friday 6/3/ 2011
For: Saturday 6/4/2011

Pains Bay Fire
 Lloyd Brown FBAN

Weather Summary: A stationary front will linger well south of the area through Saturday, then dissipate. High pressure over the Great Lakes tonight will move southeast and into the Carolinas Saturday. A cold front will move through from the northwest on Sunday night. High pressure will build across the southeast states behind the front into next week.

Today will be Mostly Sunny. Areas of smoke and patchy fog early in the morning. High temp 81, Minimum RH 40%, 1 hour fuel moisture – 9 %. N to NE winds 5-10G15.

Time	0800	1200	1400	1600
Temp	68	77	79	79
RH	61%	43%	41%	41%
Wind	N-6G10	N-7G15	N-6G10	NE-8G15

Night Weather: Mostly Clear.

1800 Temp 77 RH 47 Wind NE-7G15
 2200 74 59 SE-5
 0200 72 76 S-5
 0400 71 81 S-6G10

Local Thresholds – Watch Out! Wind speed over 15mph, RH less than 25, Temperature over 90

General Fire Behavior: The fire made its last run on Monday May 23rd burning approximately 3,000 additional acres. It laid down in pocosin fuels with an over story of Pines. Since that time smoldering ground fire has been observed along with active fire creeping in the litter and flare-ups that die back down. The fire has burned actively in green and cured fuels. Lofting embers have been observed with some spotting. The fire will continue to be active today with increased drying and lower relative humidity.

Specific Fire Behavior

Alpha, Bravo – Mostly cold perimeter with some interior backing ground fire. Expect some reburning on the interior as unburned fuels continue to cure. Remaining ground fire in this division may require additional attention if it continues to back toward the SW perimeter.

Charlie, Delta, Foxtrot – Remaining ground fire on the spotover along Long Curve Road will be active today. Low humidity may “wake up” pockets of ground fire that have not been extinguished through pumping operations.

Mike, November, Oscar - These **three divisions contain the most active fire**, mostly ground fire in the interior and along the perimeter of these divisions. There is also active fire creeping in the litter of these divisions with occasional flare-ups that die back down. Green fuels will continue to burn and cured but unburned fine fuels will also reburn causing flare-ups. Lofting embers along perimeters may cause spotting into unburned fuels. North winds will put pressure on Jackson Road. Shading of fuels and partial to full sheltering from the wind should contribute to containment efforts. The fire should be active today with the forecasted weather conditions.

Fuel Model	ROS chains/hr	Flame Length	Spot Distance – Miles	PIG
Sh9 - Very High Load Humid Climate shrub	27	14	.2	36 %

KBDI....528

ERC...39 is a number related to the available energy (BTU) per unit area (square foot) within the flaming front at the head of a fire. As live fuels cure and dead fuels dry, the ERC will increase and can be described as a build-up index.

Controllability- Indirect attack should be used if fires become established. Aircraft should always be utilized in the containment effort.

HEALTH AND SAFETY MESSAGE

MOTIVATE Firefighters With A "Can Do Safely" Attitude!!!

INCIDENT: Pains Bay Fire

DATE: 6/4/11

TIME: 0700-1900

Signature:

Major Hazards and Risks:

DRIVING - Drive defensively. Use passenger as a lookout, navigator, and backing guide. Obey speed limits. Use headlights and seatbelts. 10 MPH in very dusty road conditions. Clean your windows. Watch out for Bears!

FIRING OPERATIONS – Ensure all resources are briefed prior to starting firing operation. LCES should be in place and reevaluated during operation.

AIR OPERATIONS- Stay away from bucket and retardant drop areas. Use air to ground frequency when communicating with aircraft. Stay safe distance from drop zones of tankers and helicopters.

HYDRATION/HEAT STRESS - Temperatures are on the rise. The body shuts down the thirst mechanism when you're dehydrated, therefore, be sure to drink a lot, before you get thirsty. 4:1 water to Powerade or Gatorade.

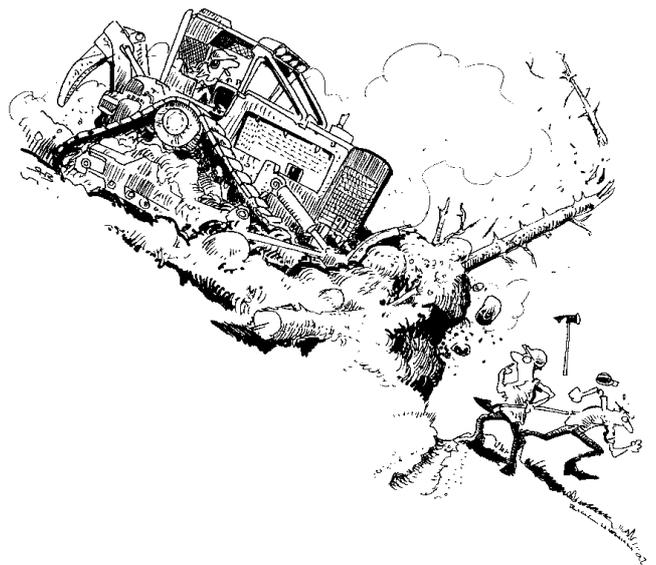

FIRE BEHAVIOR – Maintain situational awareness, follow 10 Standard Orders, recognize / mitigate the 18 Watch Out Situations, and apply LCES. Know the fire weather forecast. Monitor conditions.

Pumps - Operators and Mechanics should be the only personnel near pumps. PTOs and exposed drive belts can injure you. Canal banks can collapse. Noise levels can be high. Shut down pumps to service.

ENVIRONMENTAL HAZARDS - Watch for and stay away from rattlesnakes, stinging insects and wildlife. Use appropriate insect repellents. If bitten or stung, seek medical attention immediately.

SNAGS – Stay out of area, essential fireline personnel only. Look at root system before working/parking. Refer to IRPG pg. 20-21.

Keep Your Resources Informed!!!

5. UNINFORMED ON STRATEGY, TACTICS AND HAZARDS

Safety Officers: Keith Jenkins SOF2, Don Kuykendall SOF2, Andy Meadows SOF2, & Jeff Marshburn SOF2(T)

Outer Banks Hospital		Mile Post 14, 4800 S. Croatan Hwy Nags Head, NC Latitude: N 35° 56' 20.33" Longitude: W 75° 45' 5.89"		15 30		(252) 449-4500		X	
Sentara Norfolk General Hospital		Norfolk, VA TRAUMA BURN CENTER		30 90		(757) 388-3000		X	
8. Medical Emergency Procedures									
<p>**FOR CRITICAL EMERGENCIES** Step 1. Report all injuries and illnesses to the closest DIVS. DIVS will notify the Line EMT and ICP Communications, and include the extent of the injury and transportation needed. Do not use patient's name on the radio. A medical emergency should be declared over the radio immediately. All radio traffic will be kept to a minimum so emergency procedures can proceed uninhibited. Step 2. ICP Communications will notify Dare Central Dispatch (911) and MEDL. Safety will be notified. Dare County EMS will respond and determine the appropriate treatment, transportation and facility needed. If ground transportation is determined, assign personnel to meet the ambulance at a location that is easily accessible to lead them to the site of the injured. If patient is transported to meet EMS personnel need to remain with patient until EMS has arrived. Line EMT is staged at Navy Shell & Long Curve Rd. to respond to injuries and stabilize patient until EMS personnel arrive. **FOR MINOR EMERGENCIES** Step 1. Patient - Will Advise Their Supervisor Step 2. Patient - Will Receive Care Step 3. Patient Supervisor/Patient - Will Advise Division Supervisor Step 4. Div. Sup/Patient Supervisor- Will Document Incident On 214 Step 5. Div. Sup. /Patient's Supervisor - Will Advise The Medical Unit Leader At The End Of Each Shift Of ANY Illness or Injury And Of ANY Medical Care Given.</p> <p>**If transportation is needed it will be arranged by MEDL.**</p> <p>Nighttime Operations: Communicate all emergency medical needs directly to Dare County Emergency Communications via 800mhz radio furnished by NCDFR Dare County Ranger, and contact Safety Officers Andy Meadows 252-229-0160 or Don Kuykendall 919-218-9505 and Jimmy Halliburton MEDL (T) 828-292-6503.</p> <p><u>ANY INJURY OR ILLNESS IN WHICH ANY TYPE OF CARE IS GIVEN WILL BE DOCUMENTED ON THE UNIT'S 214 AND THE MEDICAL UNIT LEADER WILL EITHER RECEIVE A COPY OF THE 214 OR BE ADVISED VERBALLY BY THE DIVISION SUPERVISOR, PATIENT'S SUPERVISOR OR PATIENT AT THE END OF EACH SHIFT.</u></p>
